SUBJECT INDEX

Acid-base status
  intracellular, hyperoxia (trout), 91
Airways
  role leukocytes bronchial constriction, 139
  upper, laryngeal nerve, 355
Alveolar gas exchange
  AaD_{O_2} in exercise, 283
Alveolar gas mixing
  in exercise, 283

Barotrauma
  pulmonary, mechanics of breathing, 293
Blood flow
  and geometry, pulmonary artery, 77
Bronchoconstriction
  capsaicin, C-fibers, exsanguination, 139
  phrenic activity, 245

Carbon dioxide
  nasal receptors (tegu lizard), 65
  washout and equilibration, 159
Carbonic anhydrase
  selective renal blockade, 333
Carotid bodies, *see Chemoreceptors*
Chemoreceptors
  carotid, aortic, response hyperoxia, 233
  carotid body, thermal effects (cat), 51
  keto-doxapram, 345
Colloid osmotic pressure
  pleural liquid drainage, 271
Compartmental analysis
  CO_2/HCO_3^- equilibration, 159
Compliance
  lung (rabbit), 189
  whole lung *vs* lung lobe, 25
Control of breathing
  aortic, carotid chemoreceptors, 233
  bronchoconstriction affects phrenic activity (dog), 245
  carotid body, keto-doxapram, 345
  central chemosensitivity, 369
  exercise, 381
  exercise, CO_2 inhalation, 315
  high altitude, sleep, 333
  hyperthermia, pattern of breathing, 51
  isocapnic hypoxia, exercise, 393
  peripheral receptors, 215

Convection
  gas mixing, lung, 1

Development
  viscoelastic lung properties (rabbit), 189
Diffusion
  gas mixing, lung, 1
Distribution
  $\dot{V}_A/\dot{Q}/D_L$ lung, 171

Elastance
  lung (rabbit), 189
Electrolytes
  intracellular Na^+, K^+, 91
Electrophysiological recording
  brainstem preparation, 369
Emphysema
  mediastinal, barotrauma, 293
Exercise
  anaerobic threshold, 381
  entrainment of breathing to cycling frequency, 381
  gas exchange, 283
  respiratory muscles, 315

Fish
  rainbow trout, 91
Functional heterogeneity
  $\dot{V}_A/\dot{Q}/D_L$ distribution, 171

High altitude
  carbonic anhydrase, periodic breathing, 333
  mountains of Peru, 147
History
  mountains of Peru, 147
Hyperbaria
  central chemosensitivity, 369
Hypercapnia
  CO_2 redistribution, 159
Hyperoxia
  acid-base status (trout), 91
  peripheral chemoreceptors, 233
Hypoxia
  acute altitude sickness, 147
  biphasic response, 393
  drop metabolism, 115
  isocapnic, exercise, 393

Inert gas
distribution, lung, 1, 171

Life state
newborn cat, 115

Mammals
awake pony, 315
baboon, 41
cat, 51, 233, newborn, 115
dog, 77, 199, 245, 405
guinea pig, 139, 215
human, 15, 171, 283, 293, 305, 333, 381, 393
lamb, newborn, 345
pig, 25
rabbit, 125, 159, 189, 271
rat, 355, 369
Mechanics of breathing
bronchoconstriction affects phrenic activity (dog), 245
compliance (pig), 25
esophageal *vs* mouth pressure, 305
lung elastance, compliance (rabbit), 189
pulmonary distensibility, 293
respiratory muscle, defensive reflexes, 199
Mediators
substance P, tracheal submucosal gland secretion, 405
Medulla
ventral, substance P, 405
Metabolism
hypoxia-induced drop, 115
temperature (lizard), 257
Model
inert gas distribution, 1

Neural response
bronchial constriction, C-fibers, 139
Neurobiology
superior laryngeal nerve, 355

Pathology
interstitial pneumonia, functional lung heterogeneity, 171
Pattern of breathing
hyperthermia (cat), 51
Pharmacological agents
acetazolamide, 125
amiloride, 125
capsaicin, 139
cyanide, peripheral chemoreceptors, 233
disulfonic stilbene, 125
keto-doxapram, 345
nicotine, peripheral chemoreceptors, 233
ouabain, 125
Phrenic activity
bronchoconstriction, 245
Pleura
electrolyte transport, 125
lymphatic drainage, protein exchange, 271
Pressure
and geometry, pulmonary artery, 77
esophageal *vs* mouth, 305
Pulmonary artery
geometry dependent on pressure, flow, 77
Pulmonary function
sniff, pressures, 305

Receptors
laryngeal, 215
nasal CO_2 (tegu lizard), 65
upper airways, 355
Reflexes
cough, sneezing, 199
Reptiles
lizard, *Ctenophorus nuchalis*, 257, tegu, 65
Respiratory muscles
exercise, CO_2 inhalation, 315
expiratory, defensive reflexes, 199
mechanical properties (diaphragm, parasternals), 41
sniff, 305

Secretion
tracheal submucosal gland, 405
Sleep
periodic breathing, high altitude, 333

Techniques
PV properties upper airways (human), 15
Temperature
ventilation, metabolism (lizard), 257
Trachea
submucosal gland secretion, 405
Transport
pleural, electrolytes, 125

Upper airways
laryngeal afferents, 215
PV properties (human), 15

Ventilation
breathing pattern, temperature (lizard), 257
